

How could you reduce the risk of catheter occlusion for your patients?

One simple solution

One·Link Needle-free IV Connector

Baxter's ONE-LINK Connector:

- Simple to use
- Provides neutral fluid displacement, reducing the risk of catheter occlusion associated with devices with higher reflux volumes¹
- Suitable for CT/MRI applications
- Universal device that can help standardise across the hospital

For Healthcare Professionals Only.

Baxter

Rx Only. For safe and proper use of these devices, refer to the appropriate Instructions for Use. Available upon request.

Baxter and One-Link are trademarks of Baxter International Inc.
